Coral Sea —
Solomon Islands*

1925 13 ROY C. AGREN

The eyes of the United Nations are on the Douglas El Segundo plant, for here we have created aerial weapons that again and again have sent Hirohito reeling. This special issue of AIRVIEW tells of our part in the drive to victory. I want you to have a copy, because your achievements have made the story possible. Every El Segundo-built dive-bomber that roars through the sky is your message of faith and courage to free men everywhere.

T. Springer

Manager, El Segundo Plant
