Beautifully designed by Louis Casale, this rugged, aluminum Control Line Model can really “take it.” A master performer in the hands of an expert...a steady, reliable, easy-to-fly “trainer” for the novice. • All Aluminum, except for wing and elevators, the Casalaire comes in kit form, with all metal parts die-stamped and pre-shaped. Can be completely assembled and ready to fly in just a few hours. Takes a “B” or “C” gas engine.
