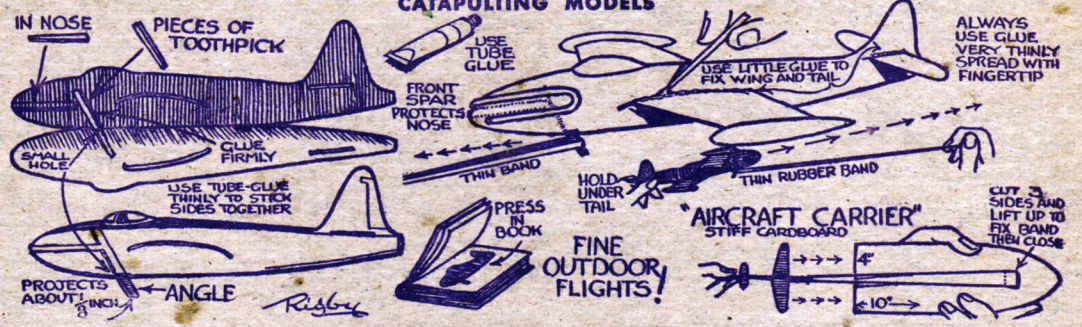
NABISCO "FLYING CIRCUS" INDEX OF PREPARATION AND FLIGHT

24 FLYING MODELS

CATAPULTING MODELS



CREASE TO FORM BENDING HINGE

DIRECTIONS:—(1) Cut out cabin slits; fold between arrows (2) Line up cabin sides then make slits for wing and tail assemblies (3) Cut out wing and tail sections; insert carefully in proper slits. *Wings must be flat*

TRIMMING: (See Left) Wing and tail surfaces and paper clip must be trim. If plane turns to left or right check level of wing and line up.

LAUNCHING: (See Right) Place paper clip in position. Launch plane as throwing dart. *Obtain "Tricks For Flying" on other cards in series.*
