

SIMPLE ASSEMBLY INSTRUCTIONS FOR UNITED AIR LINES SUPER-MAINLINER DOUGLAS DC-4

This faithful miniature replica of the new 42-passenger 4-engined "Super Mainliner" has been approved by United Air Lines.

Read instructions through, and compare all parts with the drawings before you start to assemble this model. You will be much more pleased with the finished result if you follow instructions in the order in which they are given. Mix only a small quantity of the glue at a time. It is not necessary to use glue clamps when assembling StromBecker Models.

Sand fuselage (M1) and glue on tail parts (M2), (M3), and (M4). After the glue has thoroughly dried, sand the parts to shape, rounding the edges as shown at cross sections AA and BB on drawings, with coarse sandpaper and finish with fine sandpaper.

Glue the left and right wings (M5) and (M6) together. After glue has dried, assemble wing to fuselage with glue, being careful that the wing is square with fuselage and in the center. Sand the wing to shape as shown at cross sections CC and DD on

drawing. Round off front and rear edges with coarse sandpaper and finish with fine sandpaper carefully.

Nail propellers onto engines (M7 and M8). Assemble engines to wing as shown on drawing. Note that the engines are cut on bevel, two are made to fit the right wing and two the left wing.

Assemble the two bent wires to the two large landing gear wheels. Put a little glue in the holes of the wing and insert wires. See drawing. Assemble the small wheel to wire clip. Put glue in the hole in nose of fuselage and insert wire clip.

Many model makers prefer to finish their models in natural wood finish, using

All sets are carefully packed, but if you find a shortage or defective part, fill out this slip and we will send it without cost.

Part numbers will be found on drawings. Model number is on flap at end of carton.

(Write plainly)

Part Number.....Model Number C 4
